

## Five-Star-Climate

References:  
A Feel-good Climate for Hotels

A man with a beard, wearing a blue denim jacket, is leaning over a woman with curly hair wearing a light-colored floral patterned shirt. They are in a restaurant or bar setting with blurred lights and other people in the background. The man is looking down at something the woman is holding, possibly a menu or a tablet.

# A fresh look for your hotel

Satisfied guests – this is the ultimate aim when designing a hotel. And the air quality in the bedrooms is a crucial factor in this. That's why hoteliers across Europe are relying on Kampmann air conditioning: Kampmann offers a one-stop efficient, integrated air conditioning system precisely tailored to your project. Give your hotel a fresh look – like so many other hoteliers: here are just a few references we have listed for you.

Hotel niu Cobbles, Essen (Germany)

# Kampmann. Exactly my kind of hotel-climate.

With over 950 employees at 16 locations around the world, Kampmann is one of the major players in the construction and building services industries. Kampmann systems for heating, cooling and ventilation are at the forefront of different market segments today.

Traditionally, Kampmann's expertise has focused on series production with an extraordinary variety of options, as well as on visually attractive, custom-made, project-based solutions.

This expertise pays for itself with the operators of hotel and their investors. After all, the air conditioning of a hotel places the most diverse requirements on the technology: lobby, restaurant, meeting and conference rooms, spa area and ultimately the rooms themselves all have to be considered individually.

Kampmann has the right products and solutions for all spaces with its years of experience in the fitting out of hotels. Indoor comfort climate for guests: you can expect energy efficiency, convenient operation by integration into the BMS, compliance with all statutory requirements and guidelines and first-class service from a Kampmann system.

Hotel Looken Inn, Lingen (Germany)

# Hotel Victory, Erding (Germany)

“Erding Therme” was opened in 1999 and has gradually grown to become Europe’s largest spa and thermal bath complex. Now the leisure pool, which to date has welcomed up to 10,000 visitors per day, has been extended by an exclusive hotel.

The investor Josef Wund, known as the “Pool King”, has provided a very special hotel at the side of the new wave pool: in the shape of a ship’s hull, modelled on the HMS Victory, the ship on which the legendary Lord Nelson sailed into the Battle of Trafalgar. Even the bedrooms carry on the maritime theme. Some are designed to give the feel of a luxury yacht, others the feel of a windjammer within the “sophisticated” surroundings of the HMS Victory.

# Schloss Elmau Retreat, Elmau (Germany)

The G7 summit was held at Schloss Elmau on 7 and 8 June 2015. Over several days, the hotel was in the focus of the world's attention. However, even without this spectacular event, Schloss Elmau is a historical venue, which has survived highs and lows.

The historical Schloss Elmau was opened in 1916. In spite of its remote location in an idyllic alpine valley in the Wetterstein range, it rapidly became known for its cultural events, which attracted a number of prominent regular guests. It continued in the same vein after the difficult war years, however at the same time it was constantly expanded to become a luxury spa by its owner Dietmar Müller-Elmau. And even a devastating fire in 2005 was unable to prevent its growth. The new "Schloss Elmau Retreat" was opened in March 2015 just in time for the G7 summit.

# Taleon Imperial Hotel, Saint Petersburg (Russia)

The entire pomp and ceremony of the tsar era – continues to be embodied in the Taleon Imperial Hotel. The hotel lies close to the Hermitage, one of the world's most important museums of art in the historic centre of Saint Petersburg. The Taleon Imperial thus forms part of the UNESCO World Heritage Site to which the city centre has belonged since 1990.

The Taleon Imperial Hotel with its 120 bedrooms cannot fail to impress guests with its baroque splendour: striking statues of Atlas support the roof of the bar. Marble, prominent chandeliers and lavish works of art decorate the floors and ceilings. Antique furniture and oil paintings adorn the rooms, from the windows of which guests have a direct view of the Moika River, where water taxis await guests to offer them a view of the Old Town from a new angle.

# Mövenpick Hotel in the Water Tower, Hamburg (Germany)

The Schanzenturm, formerly one of Europe's highest water towers, is today a quite unique hotel. The Mövenpick Hotel in the Schanzen Park is a short walk from Hamburg's Exhibition Centre. The massive octagonal water tower with its brick façade was thoroughly refurbished between 2005 and 2007 and converted into a hotel, which not only stands out on account of its height.

Four-star superior cannot even begin to express what awaits guests: Its attractive and central location in the Schanzen Park, its imposing architecture, centuries old cross vault, massive ceiling heights, a fantastic view (above all the Tower Suite with its 360-degree panoramic view), its one-of-a-kind ambience – it is no wonder that the Hotel im Wassertum is now one of Hamburg's most sought-after addresses.

THE LEADING HOTELS  
OF THE WORLD

# Hotel Lido Palace, Riva del Garda (Italy)

At the northern end of Lake Garda, where the lake becomes much narrower and the lakeside is surrounded by steeply rising alpine slopes – that’s the location of Riva del Garda. And in this picturesque village with its magnificent view over the lake is to be found the Hotel Lido Palace.

Opened in 1899 with the claim to be one of Europe’s best hotels, the Lido Palace did indeed quickly grow to become an outstanding venue, which even the Hapsburg royal family discovered for itself at the time. Recently, the legendary hotel was extensively restored, retaining the wonderful art nouveau interior with its resin, metal and glass. The Lido Palace is still resplendent today as a Leading Hotel of the World.

# Schlosshotel Bad Wilhelmshöhe, Kassel (Germany)

The Bergpark Wilhelmshöhe in Kassel has been a UNESCO World Heritage Site since 2013. The impressive landscape park with its feudal water features, classical palace, home to the famous museum, and naturally also the statue of Hercules rising over them all, is world renowned. The Schlosshotel Bad Wilhelmshöhe is located in the heart of these impressive surroundings.

The Schlosshotel has witnessed a thrilling history, like every other building in the park: its history dates back to 1767 – and the hotel has been the site of major political moments on several occasions. For instance in 1970 when Willy Brandt and Willy Stoph met for inter-German discussions. The hotel was thoroughly refurbished and redesigned in 2010, a process completed in 2013, which led to the hotel being awarded four-star superior status.

# Holiday Inn Express, Dresden (Germany)

A hotel simply cannot have a more prominent position – the Holiday Inn Express lies in the heart of Dresden. The world-famous sights of the Saxon city, known as the “Florence of the Elbe”, can all be reached on foot:

the Old Market (Altmarkt), on which the idyllic “Striezelmarkt” market is held during Advent, one of Germany’s oldest and loveliest Christmas markets. Just behind that lies the Zwinger Palace with its art gallery, the Semper Opera, palace chapel, Church of Our Lady, Residence Palace with its green dome and all the city’s other highlights. The Holiday Inn Express, with its wonderful location and first-class ambience, is the perfect base for excursions into Dresden’s Old Town.

# Hotel niu Cobbles, Essen (Germany)

The coal mining era is now a thing of the past. The mines are now at a standstill and what was formerly "grey with work" is today clean and tidy. However, the past is not forgotten in the Ruhr district. The new Hotel niu Cobbles in Essen is not just a young and stylish hotel, it also tells a story:

the story of coal mining. Pit lamps, helmets, Industrial Design – the hotel blends urban chic and urban history against a most elegant background. The hotel's air conditioning has nothing in common with the delicate climate underground: 146 Venkon units deliver a perfect atmosphere of well-being in the bedrooms.

# Star Inn Hotel, Heidelberg (Germany)

Heidelberg is one of the most beautiful historical cities in Germany. With the Old Town, the castle and the Old Bridge, there are numerous tourist attractions and places to see. Inevitably, there are many hotels, too. The newest one is the Star Inn, a comfortably furnished hotel offering 215 rooms and 84 fully equipped suites for the growing segment of long-stay guests.

The Star Inn Hotel & Suites Premium Heidelberg, by Quality, to give it its full name, belongs to Choice Hotels, one of the largest chains in the world with over 6,800 hotels in 2018. The Star Inn is located right in the centre of Heidelberg, making it the perfect base for excursions in and around the city on the Neckar River.

# Kampmann Products for a Feel-good Climate in Hotels

## Venkon Fan Coil

Heating, cooling and filtering with comfort

Market-leading quiet, hygiene-certified in line with VDI 6022 and particularly powerful with maximum efficiency thanks to EC-motor-technique – that is the Fan Coil Venkon from Kampmann.

## Diffusers

Ventilation components for every area

Air diffusers, grilles and distributors, dampers and controllers – smart and unobtrusively integrated or on show as a design element. The possibilities are limitless!

## Trench Convectors

For example Katherm QK, Katherm HK

Trench heating, cooling and ventilation - the perfect air conditioning solution for foyers, restaurants and hotel bedrooms with floor to ceiling windows. Maximum flexibility and efficiency.

## KaControl Room Control Unit

Comfortable control

The attractive, intuitively operated KaControl room control unit controls the wide range of Kampmann systems – for an individual climate of well-being.

## Airblock FG AHU

ErP-compliant slimline air handling unit

The Airblock FG is a flexible heating, cooling and ventilation unit with up to 90% heat recovery. Noise optimised by FlowGrid and twice as powerful with Twin technology.

## KaDeck Fan Coil

High variability at the ceiling

Whether installed within a suspended ceiling or under the ceiling; whether mounted on the wall or centrally in the room; whether with dry or wet cooling: the KaDeck offers versatile air conditioning.

## KaCool D AF Fan Coil

Ceiling heating and cooling cassette

With a minimalist appearance and sound development, the KaCool D AF is the ideal ceiling cassette for environmentally-friendly air conditioning of your hotel bedrooms. Ideal with the KaControl unit.

## KaClima

Chillers and Heat Pumps

KaClima supplies the centralised and decentralised units with heating and cooling based on the environmentally-friendly medium of water. With infinitely variable power adjustment.

# Save money with the right concept

In building services it is essential to coordinate numerous trades and coordinate them to the different spaces.

The air conditioning concept should therefore be planned at as early a time as possible and the building services should be integrated. Not forgetting the many standards, laws and regulations to be observed, including constant revisions and tightening up. Compliance with the above guarantees the optimum operation of the air conditioning system: future-proof, energy-efficient, hygienically perfect and, above all, delivering excellent indoor climate. After all, a hotel's biggest assets are and remain satisfied guests.

Kampmann is not just the leading manufacturer of heating, cooling and ventilation systems, but is also an expert in the production of tailor-made hotel air conditioning concepts. In doing so, it does not just consider the building room by room, rather considers it as a complete entity. Kampmann recommends the Hybrid ECO system for ErP-compliant ventilation in hotels. The Hybrid ECO system is a bidirectional ventilation system with extremely efficient heat recovery. Unlike with conventional ventilation systems, air conditioning is provided by decentralised units (fan coils) in the interior of the building and not via the centralised ventilation unit. This system conforms to all laws and guidelines, saves energy and space and so reduces the level of investment.

In addition, customers benefit from Kampmann's expertise in room automation. The air conditioning can either be controlled autonomously using our own KaControl system, or alternatively integrated into an existing BMS system. Ultimately, what counts above all is individualised advice. We do everything in our power to develop a coherent overall concept tailored to your specific needs.

# Future-proof air-conditioning

An air-conditioned hotel room represents added value for guests and hence adds to their satisfaction. Our Venkon Fan Coil is the market-leading unit for the air conditioning of hotel bedrooms. But where does the cold come from? The majority of air conditioning units are direct evaporation systems, such as split air conditioning units or VRV/VRF systems, but they are operated with refrigerants, which are extremely harmful to the climate.

The so-called F-Gas Regulation, which came into force in 2015 in the European Union, provides for a radical, gradual reduction in the production of these refrigerants. As a consequence, the prices for refrigerants have risen massively and many are no longer available. There are therefore high risks associated with the use of direct evaporation systems in hotel air conditioning. An excellent, future-proof alternative is the use of cold-water generators: instead of using direct evaporation systems in which the refrigerant flows from the outdoor unit along pipework to the last indoor unit, refrigerant is only used in the generator itself with chillers and heat pumps. The amounts used are therefore significantly lower and possible leak points are reduced. Kampmann would be pleased to advise you!

# Expertise and benefits

A structured design, development and implementation process forms the basis for optimum results. This process is split into five structurally separate phases, the content of which is inter-connected.

## 1 Advice

- ▶ On-site support from field project managers
- ▶ Additional personal contacts in the technical departments
- ▶ Development of individual solutions
- ▶ An additional personal contact from the Hotel Project team
- ▶ Product samples and technical guided tours in the Hotel Competence Centre near Munich and Lounge 5 in Salzburg

Advice

## 2 Design

- ▶ Design support throughout the entire design phase
- ▶ Use of many years of building services experience, e.g. in the hotel, office and commercial sectors
- ▶ Development of innovative solutions
- ▶ Responsibility for engineering work
- ▶ Technical documentation

Design

## 3 Development

- ▶ Construction and production of prototypes
- ▶ Design adaptations throughout the entire development phase
- ▶ Use of the state-of-the-art Kampmann Research & Development Centre for measurements and unit testing

Development

#### 4 Implementation

- ▶ Individual QA processes prior to shipment of the systems
- ▶ Specified delivery times and quantities
- ▶ Unit installation (depending on products)

Implementation

#### 5 After Sales Service

- ▶ Technical support – Customer Service – Instruction & functional tests
- ▶ Individual instructions for service documentation or room manuals
- ▶ Supply of spare parts
- ▶ Training

After Sales Service

# KASPACES - Mock-up bedrooms for the hotel sector

Mock-up bedrooms represent an indispensable means of achieving optimum hotel bedrooms when designing a new hotel. However, only KASPACES provides the opportunity of building the bedroom mock-up in a free-standing box: in its original size, fully functioning – and, most importantly, at a very early stage in the project. This saves time, money and nerves and prevents you from having endless sleepless nights.

**Be on the safe side: Design your hotel room with KASPACES – Find out more now!**

#### **BENEFIT NO. 1 – TIME & MONEY**

What may appear, at first glance, as more work, is guaranteed to save time and money in the long run: minimise the risks by building a mock-up room. If you don't build a mock-up room, you risk time-consuming and costly reworking if problems arise with the construction.

#### **BENEFIT NO. 2 – SECURITY & TECHNOLOGY**

Check your room: Does the technology work as required? Does the room layout work? Are the sockets positioned correctly? You can clarify and optimise essential questions about the general layout at an early stage with a mock-up room.

#### **BENEFIT NO. 3 – INTERIOR & DESIGN**

You can really only check your interior in a real installation: carpets, bathroom fixtures, furniture, lighting, windows... sometimes the quality is not right and sometimes the colour just doesn't work. You can make sure with a mock-up room.

#### **BENEFIT NO. 4 – MARKETING & ADVERTISING**

You start marketing a hotel well before the building is completed. Use your fully equipped mock-up room to take professional-looking images and give the press or potential buyers a tour of the room.

**KASPACES**  
Your room in a box.

# LOUNGE 5

## Business Network & Showroom

Designed as a huge showroom, LOUNGE 5 is located in the historic halls of a former bell foundry in the Salzburg town of GUSSWERK and provides the perfect backdrop for manufacturers who wish to showcase their products in a very special, dynamic environment.

The vision of LOUNGE 5 is to bring together the most innovative companies, producers and manufacturers from a wide range of sectors under a single roof and network them with each other. Sustainably. And target-orientated. Visionaries, trend scouts, architects, project developers and, of course, anyone enthusiastic about design and innovation don't just get input in LOUNGE 5. A visit becomes an overall experience for all the senses: you can see for yourself the feel and functionality of products, as well as their aesthetics and design, and experience them perfectly integrated into everyday life.

LOUNGE 5  
Sölheimerstraße 16,  
Gusswerk Objekt 6c  
5020 Salzburg (Austria)  
**Lounge5.com**

# Hotel Competence Centre

## Inspiration & Exhibition

The design, construction and fit-out of a hotel is an extremely complex matter. Architecture, interior design, restaurants, conference technology, spas, safety aspects, environment and hygiene – not forgetting air conditioning: all the sub-areas are areas of expertise in themselves. And they all need to be coordinated with each other. A Herculean task for investors, architects or designers.

The Hotel Competence Centre in Oberschleißheim near Munich offers an overview to prospective customers. The Hotel Competence Centre houses a hotel floor par excellence: visitors can gain an impression of innovative products and solutions in eleven fully functioning mock-up rooms, plus bar, foyer and reception. Over 190 manufacturers and service providers showcase and provide information on virtually all hotel fit-out equipment over an area covering some 1,000 square metres, including, of course, Kampmann air conditioning.

Hotelkompetenzzentrum  
 Sonnenstraße 19  
 85764 Oberschleißheim (Germany)
